PRCC data 2013-2014.xlsx

Good morning Alana-

The attached spreadsheet has the monitoring data for all of the facilities in the specified area. Let me know if you have any questions or concerns regarding the data.

Sincerely,

Carrie Sandahl

Water Environment Specialist

Yes, I have all 5.

For the moment, could you just send the most recent sampling reports (2013-2014) for 501 Ellis and any others with sampling requirements. Correct, cooling towers not of interest.

Thanks!

Alana

Hi Alana,

There should have been 5 separate e-mails with the permits, so if you did not receive all 5, please let me know the emails you did receive so I can re-send the others.

The results are not available on-line, but we do have the data. Please let me know how far back you would like to look and which facilities you would like to see. Many of the permits do not have sampling requirements so we won't include those, and the machine shops and cooling towers are probably not an interest.

Eric

Thanks Eric!

I received all three emails. Is there an easy way to find out the discharger's reporting results. Is it posted online?

Thanks,

Alana

Subject: RE: Follow-up EPA data request to City of Mtn View

Hello,

I am sending this e-mail in response to the request for copies of the Industrial Waste Discharge Permits for facilities located upstream of the study EPA investigation area near Fairchild Avenue. The City has 14 permits issued to facilities upstream from the investigation area. These permits are issued for a variety of discharge types, including groundwater, machine shops, labs, and other regulated facilities. To prevent my email from being sent back because the file is too big, I will be sending the copies in batches, starting with the Groundwater permits. The requested 501 Ellis permit is attached as well as another permit which is in place for discharges of periodic monitoring water so discharges of small amount of groundwater only occur a couple times a year.

I will be following up with copies of the other permits.

Please let me know if you have questions. Carrie Sandahl from our office is copied on this and she may provide additional information as she is responsible for inspecting a lot

of the facilities.

Also, you will note that we are right at the expiration date for permits and they are in process. We are changing the format of our permits.

Thanks - Eric

Can you help with the first item or direct me to where it might be?

Hi Alison,

EPA has a few follow-up items we need. Please provide

- ☐ ☐ ☐ ☐ ☐ ☐ Copy of 501 Ellis Street (NEC/Renasas/Geosyntec) industrial waste water permit including permit discharge requirements/limits, and any reporting data, as well as any other industrial discharge permits to the Ellis St, Whisman Road, or Fairchild Drive sanitary sewer trunk lines in the area.
- ☐ ☐ ☐ ☐ ☐ ☐ Planned / priority replacement schedule of the Fairchild Drive sewer trunk lines, National Avenue, Ellis Street, N Whisman Road

● Clarification/Confirmation on previous (e.g. questions about the abandoned line at 100 Ferguson and whether the Moffett and Leong sewer lines ever connected).

- Abandoned line at the former GTE Facility (100 Ferguson Dr)

o The GIS data indicates that there is an abandoned line that extends approx. 340 feet. When was this line abandoned? Why was it abandoned? Was it abandoned in place?). City: *Please provide a vicinity map* **EPA: See attached map (20140408_100Ferguson)**

- Moffett Blvd and Leong Sewer lines

o Did the Moffett Blvd and Leong sewer lines ever connect? For example, was there ever a line connecting manholes F5-067 and F5-073?

City: Don't understand question? I don't see F5-67 Look at F5 system map. Moffett Blvd was renamed Leong when the freeway connector was constructed . The freeway connector was named Moffett Boulevard and the State typically doesn't allow for longitudinally placed utilities

o **EPA: The attached map highlights the F5-067 and F5-073 manholes (20121017_F5_Sanitary Sewer Map_[967]_Markup). The 1960 as -build posted to Dropbox (Record drawing 2660) seems to show that the sewer lines did not connect. However, please confirm.**

Thanks for all your help in providing all the information. Please let me know if you have any questions.
